

I am writing you concerning the Low Power FM expansion you are considering. I live in Sioux Falls, SD and listen to 91.3FM, K-Love which is broadcast through an FM translator. I oppose this LPFM expansion because I understand that LPFM stations would take priority over stations like K-Love. K-Love is very valuable to the Sioux Falls and surrounding area. Not only do I listen to this station in Sioux Falls, I also listen to it in other cities I travel through. The station provides a sense of community. I know a great number of people who also listen to this station in Sioux Falls and in other cities they travel through. K-Love's programming is positive and encouraging, something that is very needed in today's media with a pervasiveness of shock jocks and radio programming that is very negative. Please do not expand LPFM stations and allow them to take priority over current FM translators. Thank you.
